From Elsevier Science : Non-Invasive Monitoring of Multiphase Flows a directory listing of faculty professors for the department of mechanical engineering at michigan technological university in houghton mi fishing for dna during breeding season could help control invasive species Non-Invasive Monitoring of Multiphase Flows:

Non Invasive Monitoring of Multiphase Flows is a result of the latest advances realized in non invasive measurement

of multiphase systems by means of various tomographic and velocimetric techniques Written by experts on special topics within the realm of this subject the book reviews in 15 chapters the theoretical background and the physics of the measurement process for each of a number of techniques In addition the mathematical modeling related to the measur
