**By Mark Chen : Flash and Ambient Lighting for Digital Wedding Photography: Creating Memorable Images in Challenging Environments** the us government recently revamped its password recommendations abandoning its endorsement of picking a favorite phrase and replacing a couple characters with thats great and all but the magic really comes from the apps built in digital assistant when you tap into that the assistant makes smart suggestions of Flash and Ambient Lighting for Digital Wedding Photography: Creating Memorable Images in Challenging Environments:

1 of 1 review helpful Headlines good content weak By Rolf I didn t find this book written well at all The topics are

bang on and what I was hoping to get a lot out of but the content is weak at best The author has a light for water metaphor perhaps ok if you're starting into photography but did not resonate with me at all He carries this metaphor throughout the book The starting rule is to work your shots around Preparing wedding photographers to navigate these once in a lifetime events this resource acknowledges the highly emotional clients shifts in natural lighting and changes in location that come with the territory Showcasing countless techniques for shooting with flash by itself ambient light alone or a combination of the two the chapters provide elegant solutions to an array of potential lighting challenges that can surface on the wedding day Postproduct About the Author Mark Chen is a photographer an Adobe Certified Photoshop Instructor and the owner of Mark Chen Photography He teaches Photoshop at Houston Baptist University and Houston Community College and tours the nation giving Photoshop training sessions
