1 of 1 review helpful Not all the animals in this ebook belong to the Monkey Kingdom but instead are Great Apes By Elizabeth Well as someone mentioned Apes are not monkeys Apes are larger have fewer young and spend a longer time raising them spend more time upright and depend more on their eyes than on their noses And unlike monkeys apes do not have tails But the most important difference is that ap Don t let the game of monkey see monkey do be your child s sole association to monkeys Learning is much more complete when done with the use of this fun but highly educational book Here your child will experience being with monkeys though only through the imagination The pictures will tell a good story which will only be supported by the texts Grab a copy now
