By Robert Collier : Optical Holography we are delighted to host the exhibitors listed below at sdw 2018 the exhibition will be held on the 3rd and 5th floor of the qeii centre 26 27 june opening at 9 holography dates from 1947 when british native of hungary scientist dennis gabor developed the theory of Optical Holography:

Optical Holography deals with the use of optical holography to solve technical problems with emphasis on the properties of holograms formed with visible light Topics covered include the Fourier transform propagation and

diffraction pulsed laser holography and optical systems with spherical lenses A geometric analysis of point source holograms is also presented and holograms and hologram spatial filters formed with spatially modulated reference waves are described
